Doherty

Meet Karthik Raman

Karthik Raman is a product management leader with 17+ years of experience building and scaling enterprise platforms, commerce products, and AI-driven customer experiences at some of the world's leading technology companies. As Director of Product Management at LinkedIn, he leads the teams reimagining the end-to-end customer journey through LinkedIn Business Hub, shipping AI-powered, self-service experiences for individuals and enterprises. He also oversees several of the platforms underpinning LinkedIn's go-to-market ecosystem — including contracts, billing, identity, customer data, and user management — and helps develop the next generation of product leaders through LinkedIn's Associate Product Manager (APM) program.

Earlier in his career, Karthik built LinkedIn's enterprise commerce platform, which today supports billions of dollars in annual commerce, and led major initiatives spanning customer experience, payments, and business transformation. Before LinkedIn, he held product leadership roles at Glassdoor and YP, launching products that grew customer engagement and modernized digital experiences. With a foundation in engineering and a passion for mentoring, Karthik enjoys helping product managers build customer-centric products and lead through complexity.

Engagement Overview

Engagement

COHORTS & FORMAT

3

Days

4

Hours/Day

Format

- Remote Training
- 2 Claude Code modules per session
- 12 hours total

SCHEDULE

Date

Cohort L (Leadership)
Mon 9/14 • Wed 9/16 • Thu
9/17, 2026

Cohort 1 (Digital CX)
Mon 9/28 • Wed 9/30 • Fri 10/2,
2026

Time

Cohort L: 8:00 AM – 1:00 PM ET
Cohort 1: 9:00 AM – 1:00 PM ET

*4 hrs/day with short breaks

LOCATION

Virtual (Teams)

Both cohorts are delivered fully remote

Remote Class Requirements

Each participant needs internet access and a working video camera.

 Cameras on & Participate

Program Overview

Goals & Outcomes of Training

Training Goals

- Unify the digital experience across product — shared vocabulary, common model of “good”.
- Build org-wide AI fluency so advanced practice becomes the standard, not the exception.

Training Outcomes

Use of Claude Code

1

Real use across the workflow — skills, your CLAUDE.md memory, and the agent stack you build.

Evidence & Reasoning

2

Decisions grounded in research and the numbers, so your diagnosis holds up under scrutiny.

Clarity

3

A stranger could read your repo and understand the bet you made and what you shipped.

Shipped, Not Theorized

4

A capstone that ties your six product artifacts together.

Class Expectations

Cameras On

Be present and visible with your camera on to stay engaged in class.

Arrive On Time

Respect everyone's time by arriving promptly to sessions.

Active Engagement

Participate actively in all discussions and activities. Unmute and ask questions.

Network

During class, connect with peers and knowledge share.

Reduce Distractions

Aim to be focused during the sessions. Avoid answering emails and messages if possible.

Instructor Support

Save deeper questions for breakout rooms or end of class with your instructor so as to not stop class flow.

Daily Check-in

DETAILS

We want to hear from you; we review scores and feedback daily to iterate on approach and content.

We will leave a 2-3 minutes at the end of each session for all participants to complete this short survey before dropping from the call.

The feedback helps improve your experience and earns you credit to your certification.

Please use the QR code provided to complete the surveys at the end of each session.

 **Product School**

Let us know how today's session went!

* 3. How would you rate today's session?

* 4. Did the instructor help you reach today's learning objective by making the content clear?

Program Overview

M1

Get Oriented

Set up CLAUDE.md & your first skill

M2

Know Your Users

Synthesize research into a decision brief

M3

Build & Learn Fast

Prototype briefs & rapid iteration

M4

Work with Your Team

Codebase tours & launch readiness

M5

Read the Numbers

Data answers & trustworthy experiments

M6

Build Your Systems

Durable skills & an agent stack

Program Overview

Day 1

Orient & Discover — M1–M2

- CLAUDE.md persistent memory & first skill
- Insight synthesis & decision brief
- Draft a prototype
- Commit your first two repo artifacts

Day 2

Build & Collaborate — M3–M4

- Prototype briefs & rapid iteration
- Codebase tour & spec readiness
- Design review & QA
- Commit two more repo artifacts

Day 3

Decide & Systematize — M5–M6

- Findings, diagnosis & memo
- Reusable skills & agent stack
- Assemble the final presentation + Demo

Final Project

THE SCENARIO

Streakly

A habit + micro-learning app whose Day-7 retention slipped 48% → 39% after a v2 redesign.

The Bet

Ship the Comeback experience and Comeback Coach agent stack that wins back users who break a streak.

IN PARALLEL:

Think about your use cases & apply prompts as you go.

WHAT YOU Present

Repo

A shareable GitHub repo. One artifact per module, plus your persistent CLAUDE.md memory.

Presentation

A single HTML deck you generate from your repo in Module 6.

100% individual · live demo optional

**Let's access
your materials!**

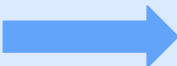

Accessing your Materials

DETAILS

You will find all participant materials in the Product School Learning Management System: Rise.

You have received an email titled "**Your upcoming Product Training**" from the email alias enterprisetraining@productschool.com.

The email will contain directions on how to access your materials for each session.

Product School

Hi Amanda

We at Product School are looking forward to training with your team!

Below are all the important details to ensure you're ready for your upcoming sessions.

TRAINING MATERIALS

To access your course materials, follow these steps:

1. Click the **"ACCESS YOUR COURSE MATERIALS"** button below
2. Enter the password: ID928
3. Press **"view"** to open your course content.

→ ACCESS YOUR COURSE MATERIALS

TRAINING DETAILS

Your training will be online via Microsoft Teams from 09/28/2026 to 10/02/2026. To ensure everything runs smoothly, please have [Microsoft Teams](#)

Claude Setup

Let's Walk-through Setup

About the Training

This Product School training equips your team with the tools and frameworks to think strategically, stay customer-focused, and deliver measurable value using AI. Over the course of **12 hours across 3 sessions**, you will learn frameworks, best practices and apply through hands-on exercises and real-world applications.

PRE-CLASS INFORMATION

Welcome to Product School & Orientation

Action: Course Setup (15min)

Pre-Day 1

Final Project

COURSE CONTENT

Product School

CLAUDE CODE FOR PMS - IDEXX

Mandatory Pre-Course Work

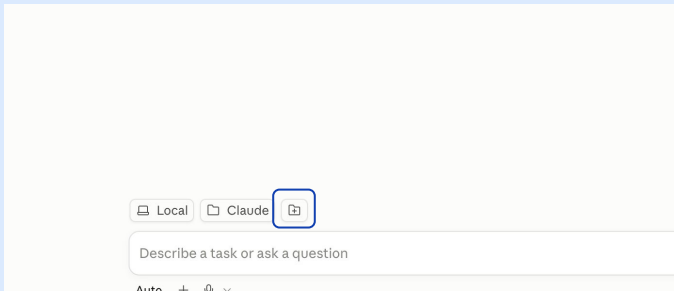

About twenty minutes. No terminal. If GitHub apps are blocked, download a ZIP instead.

- 1 Claude Pro account**
Claude Code needs a paid Pro plan or your company Anthropic contract.
- 2 Claude desktop app**
Download from claude.ai. Do not use a terminal installer.
- 3 Course folder on this computer**
Create the GitHub repo from the template, then Download ZIP and unzip. That local folder is what Claude uses.
- 4 Open the folder in Claude**
Code tab, plus icon, choose the unzipped folder. Tell Claude not to fill placeholders.

Complete this before Orientation

Let's Walk-through Setup

 [\[Pre-Class Setup\]](#)

 Project file structure orientation Claude

List the files and folders you can see. Do not create, fill in, or edit anything. We will add files step by step during the course. Confirm you can see 01-orient through 06-systems.

Ran 2 commands >

Found them in `/Users/shewitdoherty/Desktop/Orientation Demo` (not the primary `/Users/shewitdoherty/Claude` directory, which only has `.DS_Store` and `.claude`).

Contents of Orientation Demo:

- `.gitignore`
- `01-orient/`
- `02-research/`
- `03-build/`
- `04-team/`
- `05-decide/`
- `06-systems/`
- `CLAUDE.md`
- `README.md`

Confirmed: all six course folders **01-orient through 06-systems** are present. I haven't created, filled in, or edited anything — just listed what's there. Want me to peek inside each folder as well, or leave it at the top-level listing?

Certification

Certificate

REQUIREMENTS

Attend 80% of class hours

Complete final project

Issued within 1 week of course completion

Certificates issued to your email within 1 week of course completion.

Checklist

ACTION ITEM	TIME COMMITMENT
☐ Access your LMS after receiving your email from Product School.	5 mins
☐ Set up Claude Code & Repo	15 mins
☐ Read Day 1 Pre-Read	5 mins

Please use the chat function or raise your hand.
